

Anyone receiving a flu vaccine must meet the following criteria as defined by the Centers for Disease Control and Prevention (CDC priority groups):

- All children aged 6-23 months
- Adults aged 65 years and older
- Persons aged 2-64 years with underlying chronic medical conditions
- All women who will be pregnant during the influenza season
- Residents of nursing homes and long-term care facilities
- Children aged 6 months to 18 years on chronic aspirin therapy
- Health care workers involved in direct patient care
- Out-of-home caregivers and household contacts of children aged <6 months

Your own primary care provider may have influenza vaccine available for those meeting the risk criteria. Please call your provider.

FluMist® may be available for healthy individuals ages 5-49. Those who do not meet the CDC criteria to receive the flu shot may receive FluMist® as an alternative.

Those who should **NOT** receive FluMist® include:

- Adults 50 years and older and children younger than 5
- People who have long term health problems with:
 - 1) Heart disease
 - 2) Lung disease
 - 3) Asthma
 - 4) Kidney disease
 - 5) Metabolic disease, such as diabetes
 - 6) Anemia and other blood disorders
- People with weakened immune systems
- Children and adolescents on chronic aspirin therapy
- Pregnant women
- Anyone with a history of Guillain-Barre' Syndrome

See the list below to find a FluMist® provider.
